hour of day, and day of week.

- 15. (Original) The machine-readable medium of claim 11, which provides further instructions which when executed cause the machine to perform operations further comprising: determining an advertisement to be displayed based on the set of factors; and displaying the advertisement with the content.
- 16. (Currently amended) The machine-readable medium of claim 11, which provides further instructions which when executed cause the machine to perform operations further comprising; further comprising:

obtaining a bid from a client through a web based interface.

17. (Currently amended) The machine-readable medium of claim 11, which provides further instructions which when executed cause the machine to perform operations further comprising; further comprising:

displaying content that has a correlated location, the correlated location within a defined distance from a customer.

18. (Currently amended) The machine-readable medium of claim 11, which provides further instructions which when executed cause the machine to perform operations further comprising; further comprising:

displaying content that has a correlated location that is a geographic region which a customer is within.

19. (Currently amended) The machine-readable medium of claim 11, which provides further instructions which when executed cause the machine to perform operations further comprising wherein the displaying of the content [[is]] through one of a web appliance, computer system, wireless vice and interactive television system.

5

Docket No.: 578962000122

- 20. (Original) The machine-readable medium of claim 19, wherein the interactive television system utilizes a simplified navigation system.
  - 21. (Previously presented) A method comprising: displaying a set of navigation options through an interactive television channel; ranking navigation options based on a one of merchant feedback and user feedback; and arranging navigation options based on ranking.
  - 22. (Previously presented) The method of claim 21, further comprising: determining a placement of a matrix layer of a navigation interface based on ranking.
  - 23. (Previously presented) The method of claim 1, further comprising: tracking user navigation for a pay by performance system.
- 24. (Previously presented) The method of claim 1, wherein ranking the content is part of a bid for placement system.
- 25. (Currently amended) [[t]] The method of claim 1, wherein the request for content is a key word search.
- 26. (Previously presented) The machine readable medium of claim 11, providing further instructions, which when executed by a machine cause the machine to perform operations comprising:

tracking user navigation for a pay for performance system.

- 27. (Previously presented) The machine readable medium of claim 11, wherein ranking the content is part of a hide for placement system.
  - 28. (Previously presented) The machine readable medium of claim 11, wherein the request
